

Sec. 134-162. - General description of zoning districts.

The following general descriptions apply to the various zoning districts:

(1) R-80 (single-family residential, 80,000-square-foot lot size). The R-80 district is established to provide locations for single-family residential uses or residentially compatible institutional and recreational uses which are within or on the edge of properties delineated for any residential category as defined and shown on the Cobb County Comprehensive Plan: A Policy Guide, adopted November 27, 1990. When residentially compatible institutional and recreational uses are developed within the R-80 district, they should be designed and built to ensure intensity and density compatibility with adjacent single-family detached dwellings and otherwise to implement the stated purpose and intent of this chapter. Acreage within floodplains or wetlands shall be excluded when calculating the overall density of the development.

(2) RR (rural residential). The RR district is established to provide locations for large useable areas for limited residential, agricultural, park and open space needs. This district also serves to correlate growth with utility, service and transportation needs until urbanization is warranted. RR uses or residentially compatible institutional and recreational uses should be located within or on the edge of properties delineated for any residential category as defined and shown on the Cobb County Comprehensive Plan: A Policy Guide, adopted November 27, 1990. When residentially compatible institutional and recreational uses are developed within the RR district, they should be designed and built to ensure intensity and density compatibility with adjacent single-family detached dwellings and otherwise to implement the stated purpose and intent of this chapter. Acreage within floodplains or wetlands shall be excluded when calculating the overall density of the development.

(3) R-40 (single-family residential, 40,000-square-foot lot size). The R-40 district is established to provide locations for single-family residential uses or residentially compatible institutional and recreational uses which are within or on the edge of properties delineated for any residential category as defined and shown on the Cobb County Comprehensive Plan: A Policy Guide, adopted November 27, 1990. When residentially compatible institutional and recreational uses are developed within the R-40 district, they should be designed and built to ensure intensity and density compatibility with adjacent single-family detached dwellings and otherwise to implement the stated purpose and intent of this chapter. Acreage within floodplains or wetlands shall be excluded when calculating the overall density of the development.

(4) R-30 (single-family residential, 30,000-square-foot lot size). The R-30 district is established to provide locations for single-family residential uses or residentially compatible institutional and recreational uses which are within or on the edge of properties delineated for any residential category as defined and shown on the Cobb County Comprehensive Plan: A Policy Guide, adopted November 27, 1990. When residentially compatible institutional and recreational uses are developed within the R-30 district, they should be designed and built to ensure intensity and density compatibility with adjacent single-family detached dwellings and otherwise to implement the stated purpose and intent of this chapter. Acreage within floodplains or wetlands shall be excluded when calculating the overall density of the development.

(5) R-20 (single-family residential, 20,000-square-foot lot size). The R-20 district is established to provide locations for single-family residential uses or residentially compatible institutional and recreational uses which are within or on the edge of properties delineated for any residential category as defined and shown on the Cobb County Comprehensive Plan: A Policy Guide, adopted November 27, 1990. When residentially compatible institutional and recreational uses are developed within the R-20 district, they should be designed and built to ensure intensity and density compatibility with adjacent single-family detached dwellings and otherwise to implement the stated purpose and intent of this chapter. Acreage within floodplains or wetlands shall be excluded when calculating the overall density of the development.
